
Nodes LLM agent · compromised agent · data source (not an agent) · supervisor (decides)

Channels malicious · contaminated (repeats the lie) · honest (true date) · not read

Monitor 1 2 channels read together in one monitor call; the monitor does not know which agent is compromised

---

What the monitor sees with the same budget of two channels

(a) Malicious and honest, separate calls

call A: "Purchased 65 days ago"

call B: "Payment taken 20 days ago"

✗ each looks normal: missed

(b) Malicious + contaminated, one call

"Purchased 65 days ago"

"65 days old: deny"

✗ they agree: missed

(c) Malicious + honest, one call (call 1)

"Purchased 65 days ago"

"Payment taken 20 days ago"

✓ 65 ≠ 20: flagged
